

Why choose Us?

Inclusion

The community is made more robust when we remedy the exclusion and marginalization of people whose lives do not conform to the norms of the dominant culture.

Interconnection

We cultivate relationships and collaborations that promote the conditions for equity that are the foundation for everyone to experience their own concept of well-being.

Innovation

We continually challenge assumptions, structures, and beliefs – including our own – in order to open up new possibilities and solutions that enrich people's lives.

Renewal Recovery Residences

At STEP's Renewal Recovery Residence, we provide a safe, stable, and empowering living environment for individuals in recovery from substance use. Our program offers residents the accountability, community, and support they need to build healthy, fulfilling lives free from substances.

We currently serve 40+ residents across six homes:

- 2 women's homes
- 1 women & children's home
- 3 men's homes

STEP adheres to the quality standards of the National Alliance of Recovery Residences (NARR). We respect multiple pathways to recovery and believe in the social model of recovery—empowering individuals to build recovery capital together as a community.

The "WHY" of the STEP team

"I believe every child, family, and caregiver deserves to have their voice heard and their perspective valued. Our community grows stronger when people of all abilities are included. I am honored to walk alongside families and caregivers as they pursue their goals, offering support that uplifts, empowers, and celebrates each individual."

Rhea Herman, Program Manager

"Our key to success is that our team brings passion, experience, and knowledge to all we do. We are committed to the success of our clients."

Maureen Corkum, Fiscal Manager

"I do this work because I believe that everyone deserves a safe, healthy, and supportive space to recover. I've seen lives change when people are met with compassion and stability, and I'm dedicated to making that opportunity available to every person who walks through our doors."

Amanda McLaughlin, Recovery Residence Manager

"I believe that with passion comes change and that the STEP team has and will continue to provide the necessary passion to support our participants to create and live the life they choose."

Tara Williamson, Executive Director

Family Services

At STEP, we understand that every child grows and learns in their own unique way. Our Family Services are here to support families of children with developmental delays, disabilities, and special health care needs.

Using a supportive coaching approach, we walk alongside your family to help identify and reach goals that matter most to you and your child. Our services are designed to create meaningful opportunities for growth as your child learns, explores, and discovers their world.

We believe families are a child's greatest source of strength. That's why we empower you with knowledge, resources, and skills to help your child thrive—celebrating every step of progress together.
